

**The Graal** is a high-grade nickel-copper-cobalt deposit in Northern Quebec close to a deep sea port.

- + 100% owned property on over 6,000 hectares
- + Over 16,000m drilled on 6km strike length
- + Hit mineralization in almost every hole

## Key Focus:

Advance Graal towards being a world-class critical metals supplier

## Share Structure

Issued and Outstanding	30,250,000
Options	0
Warrants (\$0.40)	15,250,000
Fully Diluted	45,500,000

## Undervalued by comparison

Power Nickel's Nisk Project is at a similar level of exploration with comparable drill hole results, yet Graal is crucially 500km closer to the port of Saguenay.

Market Cap in Millions (\$CAD)

## NEXT STEPS

Expand near-surface mineralization

Consultations with First Nations

Conduct Metallurgical testing

Resource estimate, test deposit at depth

# HIGHLIGHTS

All drilling to date has been mostly near surface, hitting massive and semimassive sulphides and supporting an open-pit, nickel-copper deposit model with a cobalt byproduct and potential for added platinum and palladium byproducts. Geophysics shows the deposit sits in a large Bouguer gravity anomaly, causing geologists to also be excited by the potential for higher grades deeper, which is usual for these kinds of deposits. The deposit is divided across multiple zones, and open in all directions and at depth.

**The best drill results:** 1.07% nickel equivalent and 2.26% copper equivalent over 28.9 meters at 51-80 meters depth.

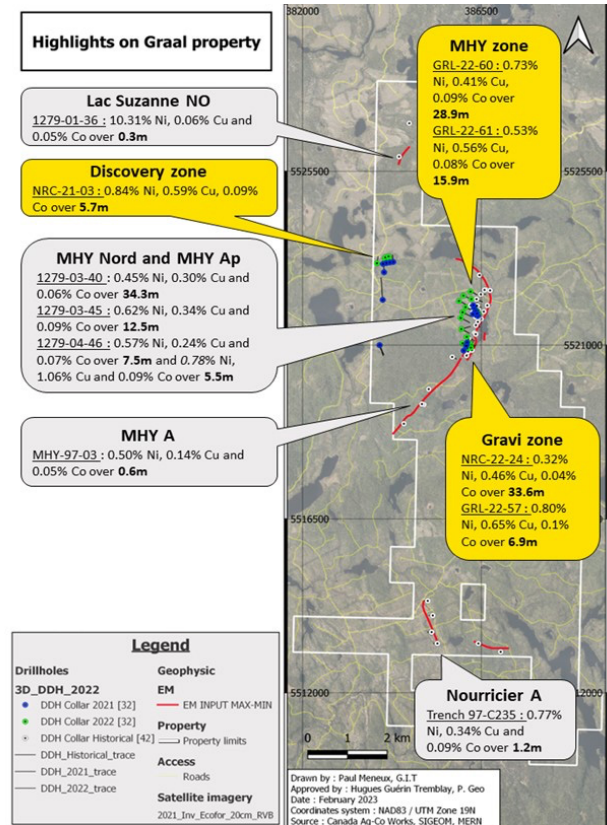

## Phase 1

Hole	Ni (%)	Cu (%)	Co (%)	Ni (%) Eq	Cu (%) Eq	Over (m)	From (m)
NRC-21-03	1.15	0.27	0.12	1.47	3.11	4.10	138.30 - 142.40
NRCS-21-15	0.43	0.43	0.06	0.73	1.54	5.80	56.30 - 62.10
NRC-22-24	0.39	0.40	0.00	0.58	1.23	30.60	121.50 - 152.10
NRC-22-26	0.57	0.41	0.00	0.76	1.62	5.80	135.00 - 140.80

## Phase 2

Hole	Ni (%)	Cu (%)	Co (%)	Ni (%) Eq	Cu (%) Eq	Over (m)	From (m)
GRL-22-60	1.15	0.41	0.09	1.07	2.26	28.90	51.50 - 80.40
GRL-22-61	0.53	0.56	0.08	0.92	1.95	15.90	62.10 - 78.00

**Note:** Phase 1 and 2 drill results are reported in Nord Precious Metals news releases June 27, 2022 and February 27, 2023. Nickel and Copper equivalents calculated March 13, 2024 on the basis of USD/MetricTonne (1000kg) for Nickel \$18,134.00, Copper \$8,560.55 and Cobalt \$28,550.00.

## PREVIOUS ESTIMATE

### 30-60 million tonnes

Estimated Potential Open-Pit Target grading:

**0.60-0.80% nickel**  
**0.30-0.50% copper**  
**0.10-0.15% cobalt**

(not including 2021-2022 drilling and discoveries.)
